welcome

“Creativity is thinking up new things. Innovation is doing new things.” Theodore Levitt

Eclipse is a certified manufacturer of solid stainless steel sinks and faucets. We control every step of our production process, from innovation to design to manufacturing. By purchasing an Eclipse product you can be assured that you are choosing a superior product that was manufactured to the highest standards in the industry. Eclipse drawn sinks are IAPMO certified UPC and C-UPC compliant. Eclipse faucets are IAPMO certified UPC, C-UPC compliant, and are NSF-61 and AB1953 lead free compliant.

Make the healthy choice

Eclipse faucets are crafted of solid cast 304 18/10 stainless steel. Our quality is apparent not only in the weight and feel, but also built into the part you can't see – the lead free interior. Our competitors manufacture faucets that are lined with rough, corrosive materials such as copper, brass or even plastic that collect impurities in your water and can cause lead emissions. An Eclipse faucet will provide years of healthy and worry-free functionality. Choose Eclipse.

Kitchen Sinks

Eclipse sinks are crafted from 100% solid 304 18/10 scratch resistant commercial grade stainless steel that resists discoloration and corrosion. They are undercoated and padded to minimize noise. Mounting hardware and cutout templates are included. Eclipse drawn sinks are IAPMO certified UPC and C-UPC compliant.
